BACK-END DEVELOPER

SUMMARY

Back-end Developer experienced in building scalable web and mobile applications using Laravel + Livewire, PHP, and Flutter. Skilled in backend API development, server-side logic, database design, and workflow optimization. Experienced in both MySQL and PostgreSQL databases. Known for problem-solving, delivering maintainable solutions, and handling both frontend and backend responsibilities in academic, IoT, and administrative systems.

EXPERIENCE

Full-Stack Developer | Capstone Project – SchedWise

March 2025 - January 2026

- Developed SchedWise, a web-based faculty loading and scheduling system, handling both frontend and backend using Laravel + Livewire and Tailwind CSS
- Designed relational databases in MySQL to manage complex timetables, faculty assignments, and room allocation
- Built real-time search, filtering, and scheduling features, improving administrative efficiency by 40%
- Applied dependency injection, server-side validation, and modular architecture for maintainable and scalable code

Web Back-End Developer (Intern & Contractual) | MDRRMO Tabogon

Jan 2026 - Present

Tabogon, Cebu

- Developed backend services and JSON-based reporting endpoints for Barangay Profiling System, Geolocation, Hazard Mapping, and Inventory System
- Used Prisma ORM with Neon PostgreSQL for efficient data management and optimized queries
- Filtered null data and streamlined inventory, vehicle, and hazard reporting workflows through backend logic
- Contributed as both an intern and contractual developer, assisting in system development and workflow automation

EDUCATION

Bachelor of Science in Information Technology

Aug 2022 - June 2026

Cebu Technological University – Tabogon Extension

SKILLS

- **Backend :** Laravel, Livewire, PHP, Nest.js
- **Frontend :** Flutter(basic), Tailwind CSS, HTML5, JavaScript
- **Database:** MySQL (Capstone & IoT), PostgreSQL with Prisma (MDRRMO), Relational Data Modeling, Query Optimization
- **Other Tools:** Git(basic), Vite, Docker (basic)
